TOPIC OUTLINE

Tools and Instruments

Data Status Monitor

Data Switch

TOOLS AND INSTRUMENTS

TOOLBOX

Portable container or **storage** unit designed to hold and organize tools and other items used for various tasks and repairs

SOLDERING IRON

20W – 30W

Supplies heat to **melt solder** so that it can flow into the joint between two workpieces

DESOLDERING PUMP

Also known as **solder sucker**

Sucks the **liquid/molten solder** from the joint where the components are mounted

NEEDLE-NOSE PLIERS

Long and narrow, with **pointy**, curved or angled tips that have a strong grip

DIAGONAL WIRE CUTTERS AND END CUTTERS (NIPPERS)

Jaws intersects the joint rivet at an angle or "on a **diagonal**"

PRECISION SCREWDRIVER SET

Set of **screwdrivers**

BREADBOARDS

A thin plastic board used to **hold** electronic components (transistors, resistors, chips, etc.) that are wired together

JUMPER WIRES

Connect **two points** to each other without soldering

MINI DRILL

Making round **holes** or driving fasteners

MULTIMETER

Also known as a **volt-ohm meter**

Handheld tester used to measure electrical **voltage**, **current**, **resistance**, and other values

TWEEZERS

Picking up objects too **small** to be easily handled with the human fingers

WIRE STRIPPER

Remove the **insulation** from electric wires

OSCILLOSCOPE

Display and analyze the **waveform** of electronic signals

POWER SUPPLY

Powers the circuit to test individual components electrical responses

DATA STATUS MONITOR
