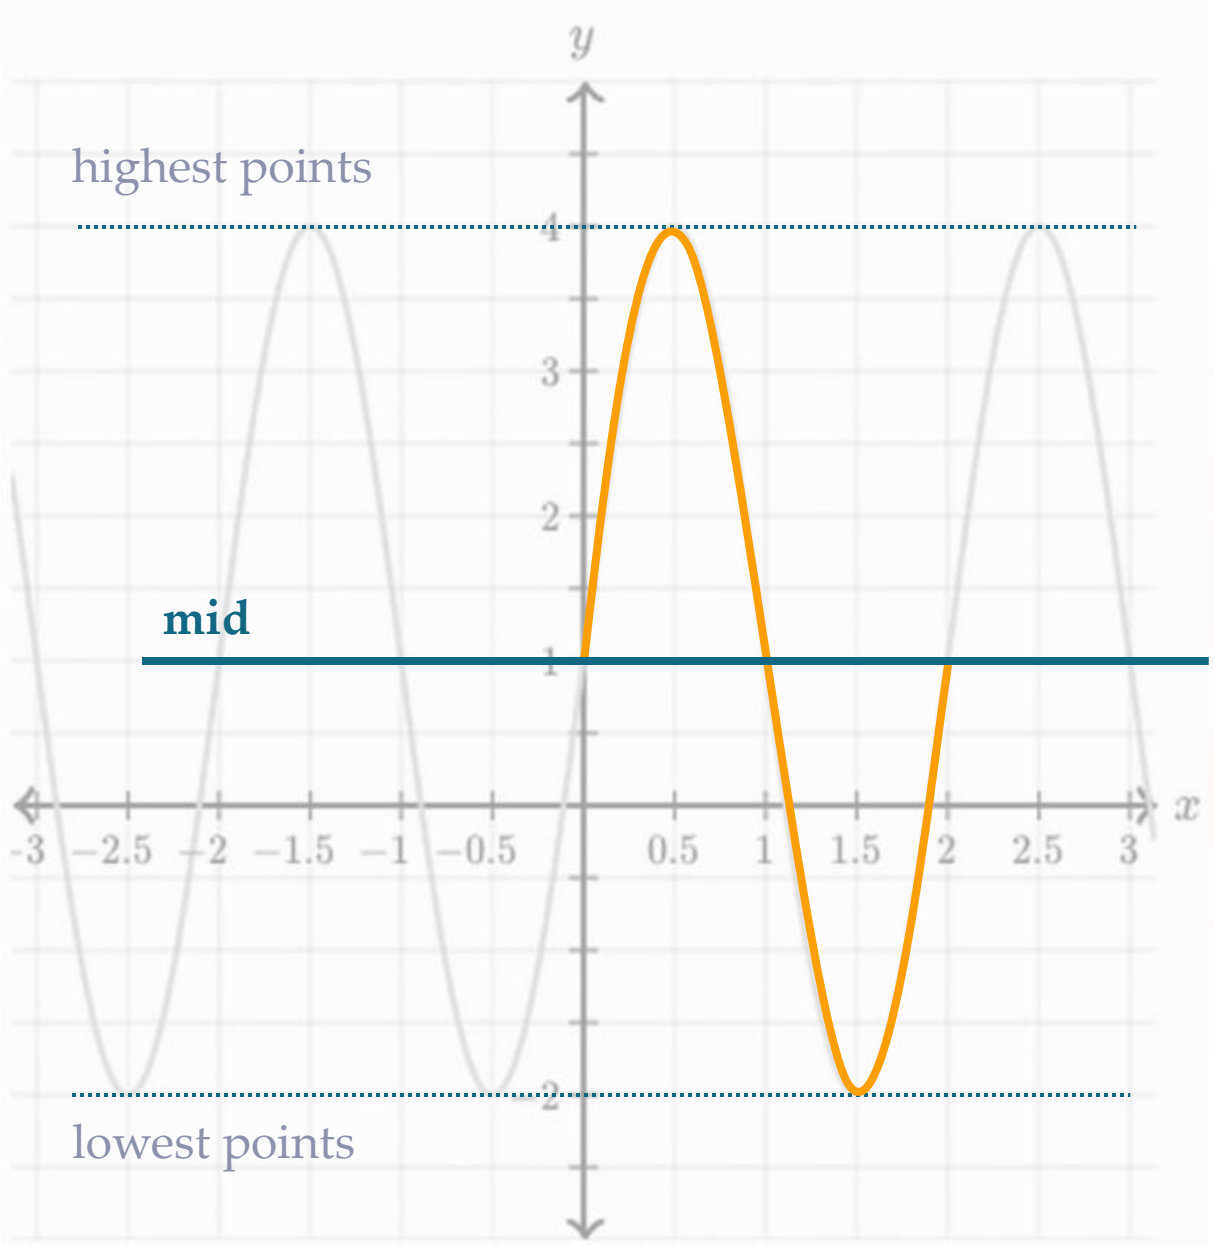
FEATURES OF SINUSOIDAL FUNCTION

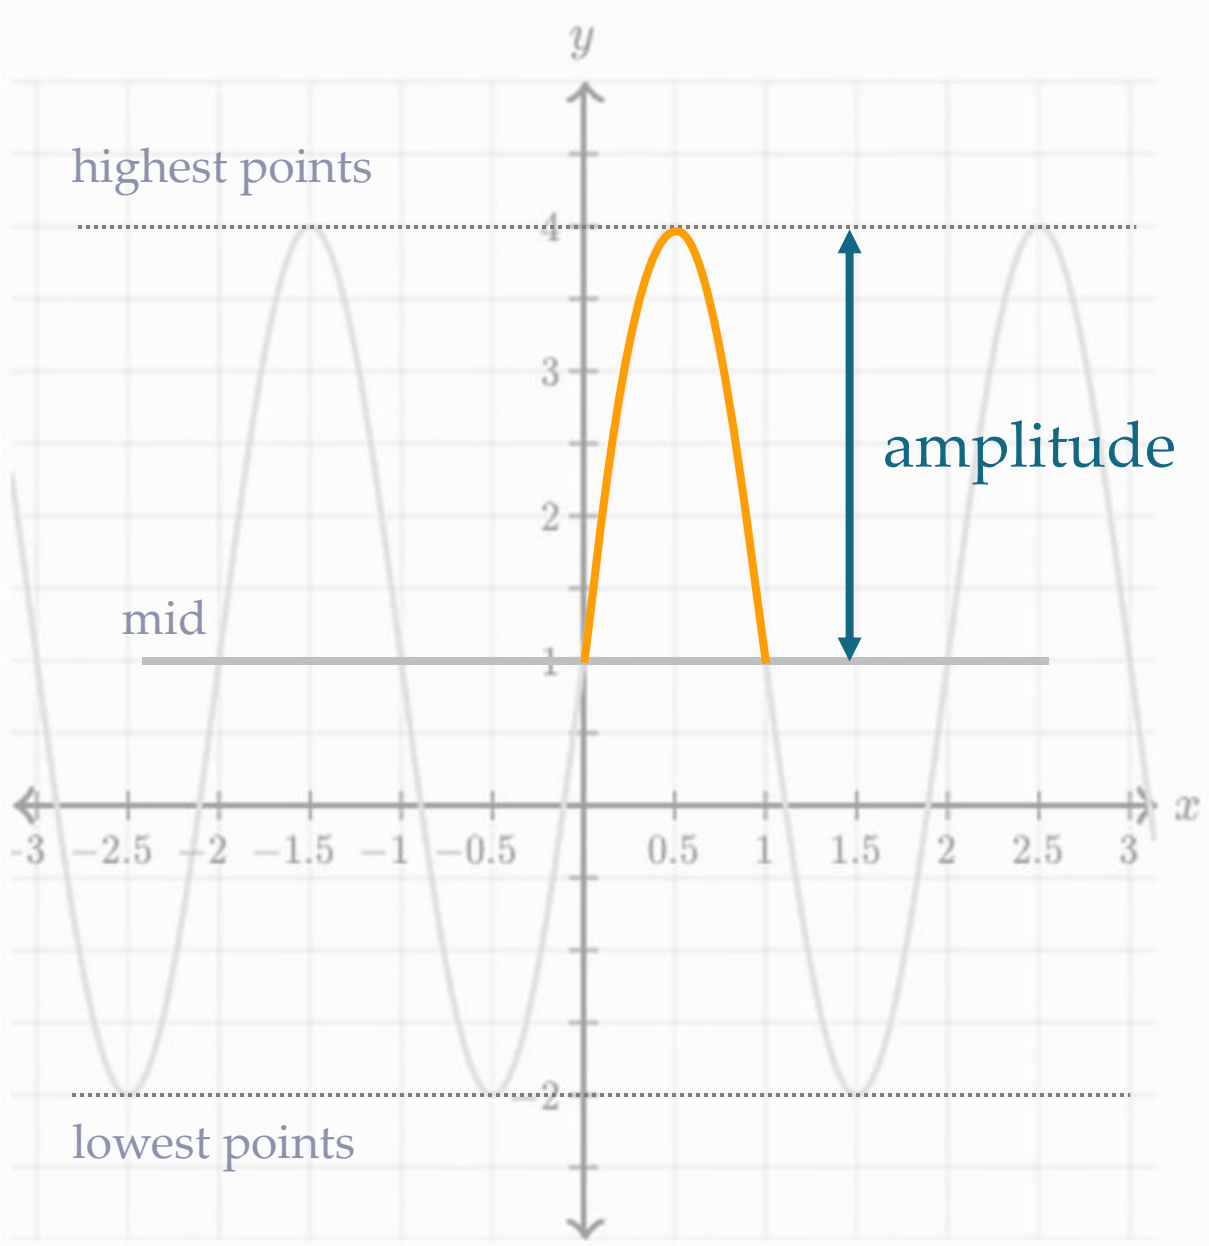
MIDLINE



A **horizontal** line between the **highest** and the **lowest** points of a function

$$y = \frac{y_{max} + y_{min}}{2}$$

AMPLITUDE

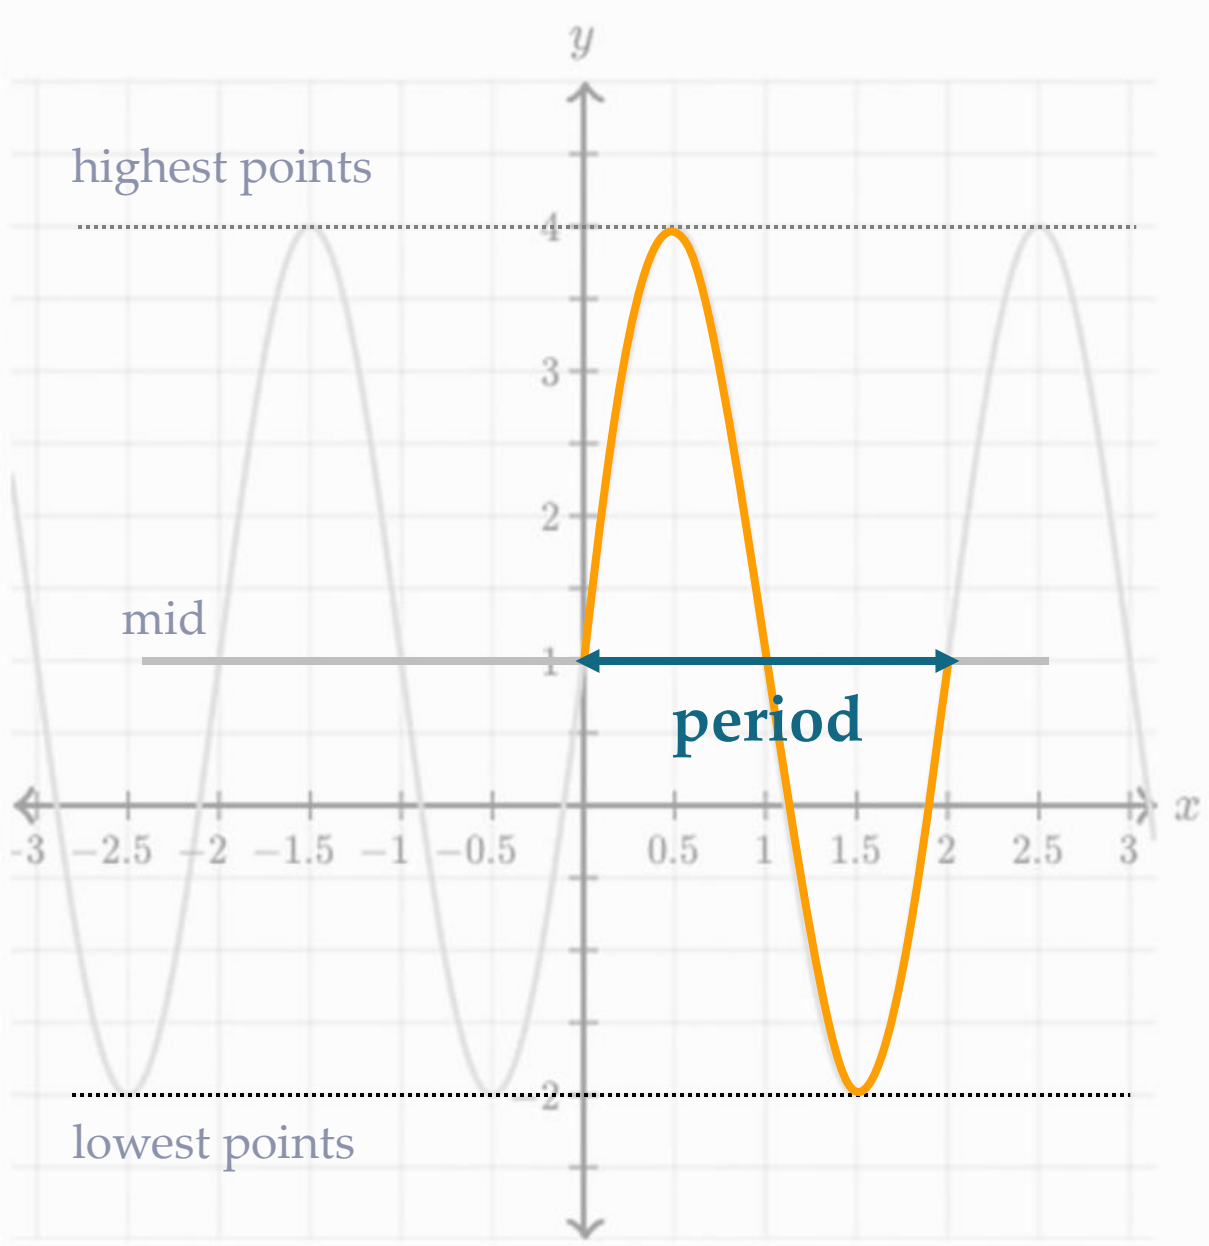


How much the function **varies** from the **midline**.

$$\text{amp} = |y_{\text{max}} - y_{\text{mid}}|$$

$$\text{amp} = |y_{\text{mid}} - y_{\text{min}}|$$

PERIOD



The change in x, Δx needed to complete **1 cycle**.

$$\textbf{period} = |x_{start} - x_{end}|$$
