FLOWCHART

FLOWCHART

A flowchart is a graphical representation of an algorithm or process. It uses various symbols to represent different actions or steps in the process. Flowcharts are often used to plan the logic of a program before writing the actual code.

Flowchart Symbols:

Represents the beginning or end of the program.

Represents a process or action, such as calculations or assignments.

Represents a decision point which is evaluated as either **true** or **false**.

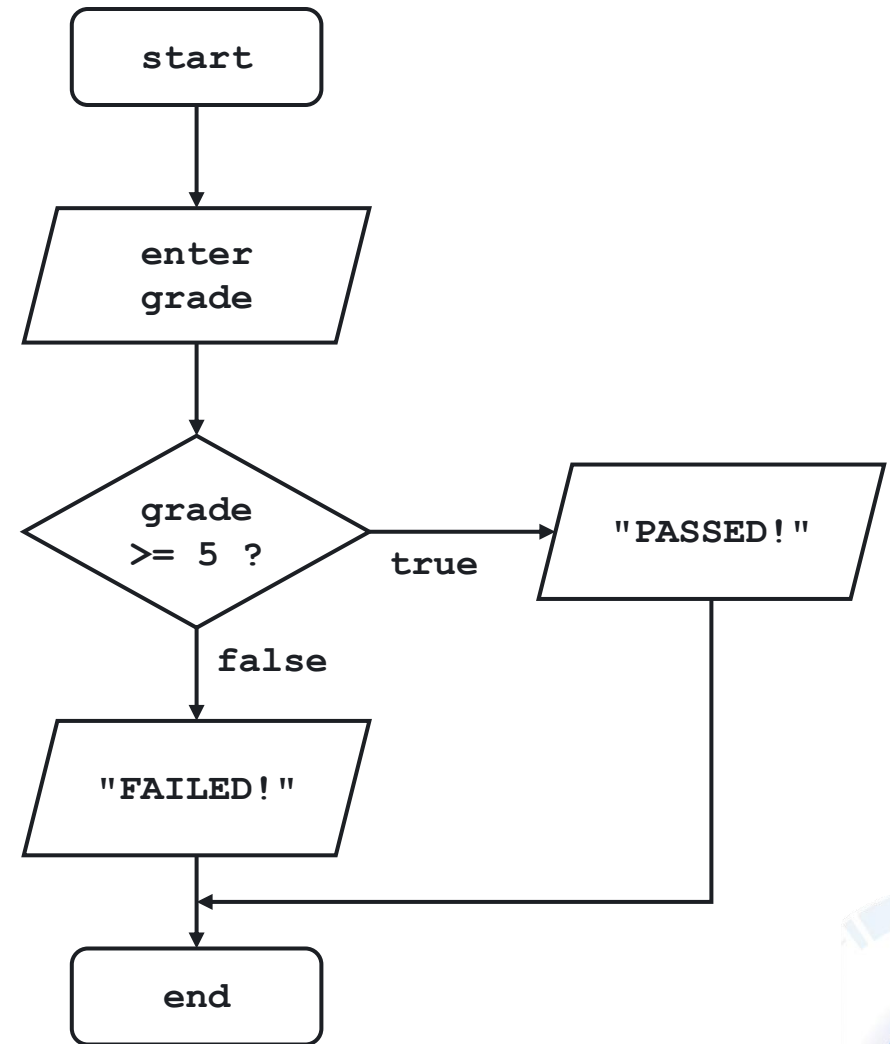

Represents input or output operations, such as reading data or displaying results.

Shows the direction of the process flow.
