for Loop

Data Analyst: Gyro A. Madrona
Department: Electrical Engineering

Iterating Over a List

```python
fruits = ["apple", "orange", "grapes"]

for i in fruits:
    print(i)

```

```python
numbers = [1,2,3,4,5,6,7,8,9,10]

for n in numbers:
    print(n)
```

```python
# start at 1, ends at 10 (exclusive), steps by 3
for j in range(1,10,3):
    print(j)
```

Iterating Over a Dictionary

```python
for char in "Python":
    print(char)
```

```python
employee = {"name":"Ada",
            "position":"analyst",
            "Salary": 80000}

for key in employee:
    print(key)

for value in employee.values():
    print(value)

```
